CUSTOM ENGINE COWLING IS LIGHTWEIGHT AND EYECATCHING

After suffering dings, scratches, and exposure to the elements, many outboard engine cowlings eventually need replacement. Bob's Machine Shop, a Tampa-based high-performance marine engine specialist, offers a lightweight, Mercury-type aftermarket cowling that is both functional and distinctive.

Nicknamed "The Alien" for its futuristic look, the all-fiberglass cowling is impact resistant and carries a super-high-gloss black finish with contrasting yellow stripe. It weighs only 33 pounds, offering a substantial weight reduction over stock units and even racing models.

Thanks to racing-style, rubber hold downs instead of metal fasteners, removal of the cowling is quick and easy. The bottom plate and bottom pan are made of high-grade stainless steel to eliminate corrosion and rust from saltwater. The cowling fits 2.0-, 2.4- and most 2.5-liter Mercury outboards.

Bob's Machine Shop's lightweight replacement engine cowling retails for \$849—about half the cost of a Mercury racing cowling. Please specify engine type when ordering.
